

Frese Tagging Service

Frese offers a tagging service to our customers in order to simplify the shipment, distribution and installation of Frese valves in your project. The tagging consists of two parts:

- A **commissioning tag** will be tied to the P/T plug of the valve or placed in the box of each individual valve.
- A **shipment tag** (sticker type) will be placed on the outside of the box for each valve and actuator for easy distribution in your warehouse and at the installation site.

Each tag will contain the information about the valve where it is to be installed in your project.

Please contact Frese to get a dedicated form, which must be used when ordering your valves with Frese Tagging Service.

The commissioning and shipment tag will be delivered according to the table below.

Tagging delivery condition

Product	Commissioning Tag		Shipment Tag
	Tag and plastic strip placed in valve box	Tag tied to P/T plug with plastic strip	
Threaded Valves Frese OPTIMA Compact & Frese SIGMA Compact DN10-50 Frese ALPHA	X		X
Flanged Valves Frese OPTIMA Compact & Frese SIGMA Compact DN50-300 Frese ALPHA Wafer		X	X

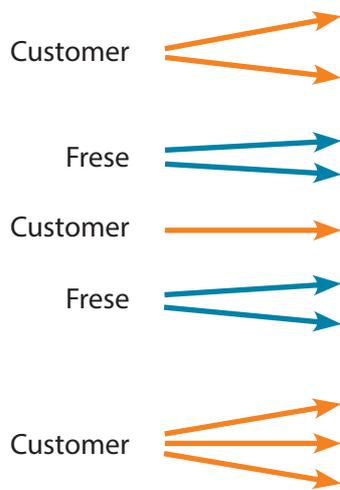

Frese Tagging Service

Detailed description of tags

The illustrations and examples below describe the information provided on the commissioning and shipment tags.

Commissioning tag

Information supplied by

Description
