

DN25-DN450

#### **Application**

The Frese ALPHA HCR (High Corrosion Resistant) Valves are particularly designed and manufactured for automatic balancing in Marine, Industrial, Oil and Gas applications.

The Frese ALPHA HCR Cartridges - the third generation cartridges - are an integral part of the Frese ALPHA HCR Valve limiting the flow at the specified level even under fluctuating pressure conditions.

The patented design of these cartridges introduces a interchangeable orifice plate for design flexibility and a resistant diaphragm for high accuracy operation.

The high quality alloy ensures a long lifecycle and low maintenance in arduous applications such as seawater.

Available in sizes DN25 & DN40 to DN450, Frese ALPHA HCR wafer guarantees the hydraulic balance of the system regardless pressure fluctuations.

#### Benefits

#### Design

- No requirement for balancing valves in the distribution lines and supply lines
- Less time to define the necessary equipment for a hydraulic balanced system
- No impact if the calculated distribution of pressure in the installation is not accurate
- Security that the specified flow is also the real one

#### Installation

- Minimized commissioning time due to automatic balancing of the system
- Cartridge solution makes flushing procedure very easy
- No need for oversized pumps and oversized control valves
- No requirements for straight diameters of pipe upstream and downstream of the valve
- Can be easily installed where space is limited

#### Operation

- Balancing of the system takes place automatically even under fluctuating pressure conditions
- Performance optimization
- Distribution/balancing optimization

#### Features

- Sizes up to DN450
- P/T plugs for differential pressure verification
- Modifications & extensions of the system do not affect the hydraulic balance in the other parts of the system
- Tamper resistant cartridge independent of flow regulation errors during commissioning and operation of the system
- Self-cleaning cartridge does not allow dirt to comprosmise the accuracy of the valve
- Resistant diaphragm between the moving parts of the cartridge eliminates friction, noise and impact from water hammer
- Delivered with 3.1 certificate as an option. Other certificates on request.
- Heat treatment acc. to 02747 Part 2#4 a+b
- Pressure test acc. to EN12266

### Indication of flow rate on orifice plate

The four-digit number on the orifice plate is identical with the last four digits of the Frese product code. The orifice can be identified by this number and the corresponding flow rate can be read from the flow rate tables.

| Frese no.        | Flow<br>[l/h] | Flow<br>[l/s] | Flow<br>[gpm] | Min.<br>ΔP<br>[kPa] | _ |
|------------------|---------------|---------------|---------------|---------------------|---|
| 59-3 <b>5162</b> | 3404          | 0.946         | 15.0          | 16                  |   |
| 59-35200         | 4769          | 1.325         | 21.0          | 19                  |   |
| 59-35227         | 5678          | 1.577         | 25.0          | 21                  |   |

## Identification of cartridge

The three-digit number on the cartridge is identical with the first three digits of the Frese product code. The cartridge can be identified by this number and the corresponding flow rate can be read from the flow rate tables.

| Frese no.        | Flow<br>[l/h] | Flow<br>[l/s] | Flow<br>[gpm] | Min.<br>ΔP<br>[kPa] |
|------------------|---------------|---------------|---------------|---------------------|
| <b>59-3</b> 5162 | 3404          | 0.946         | 15.0          | 16                  |
| 59-35200         | 4769          | 1.325         | 21.0          | 19                  |
| 59-35227         | 5678          | 1.577         | 25.0          | 21                  |

### Removal of orifice plate

The orifice plate can be removed by the special orifice-tool by sliding it in the grooves on the cartridge and back again. Then the orifice plate can be taken out.

The orifice plate can be clicked back into the cartridge again.

The orifice tool can be ordered under Frese part number: 08-0289.

DN25-DN450

#### Frese ALPHA HCR Cartridge Operation

When the pressure increases the spring will be compressed and thereby the piston will reduce the outlet area and vice versa. The result is a constant flow rate through the valve, independent of pressure fluctuations.

#### **Function**

The following applies to all flow control valves:

$$Q = Kv * \sqrt{\Delta p}$$

 $Q = Flow (m^3/h)$ 

Kv = Opening area

 $\Delta p = Differential pressure (Bar)$ 

The Frese ALPHA HCR cartridge reacts to pressure fluctuations in the system ensuring that the differential pressure across the pre-adjustment unit is kept constant. This ensures that the maximum flow limit is achieved in accordance with the design.

#### Flow Calculation

The flow through the valve can be identified by measuring the differential pressure ( $\Delta p$ ) across the valve:

If the measured differential pressure is above the minimum  $\Delta p$ , the flow is the one stated on the graph for the valve.

If the measured differential pressure is below the minimum  $\Delta p$ , the flow can be found by using the formulas below.

#### Flow Calculation

| $Q = Kv \cdot \sqrt{\Delta p}$            | Q = m3/h<br>$\Delta p = Bar$ |
|---|------------------------------|
| $Q = Kv \cdot 100 \cdot \sqrt{\Delta p}$  | Q = I/h<br>$\Delta p = kPa$  |
| $Q = \frac{Kv}{36} \cdot \sqrt{\Delta p}$ | Q = I/s<br>$\Delta p = kPa$  |

#### Simplified Outline

The cartridge enters the pressure range at 47 kPa and maintains the flow at a constant level to 600 kPa.

DN25-DN450

### Frese ALPHA HCR Valve Housing, Flanged Connection

#### Technical Data

A wafer-type valve can contain up to 33 Frese ALPHA HCR cartridges, depending on the size and the design flow.

Valve housing: Nickel Aluminium Bronze

> EN 1982 CC333G-GS, ASTM B505 C95800

P/T plugs: Nickel Aluminium Bronze

EN 1982 CC333G-GS

**Fasteners: Duplex Steel** 

**Pressure class:** PN25 (DN25 - DN80)

PN16 (DN100 - DN450)

PN25 on request

**Temperature:** -20°C to +50°C 56 l/h - 1,584 m<sup>3</sup>/h Flow range: Flange compliance: ANSI/ASME B16.5

ISO 7005-2

EN 1092-2

#### PLEASE NOTE!

The pipe system shall be properly ventilated to avoid risk of air pockets. Seawater for HCR cartridge shall be filtered with filter mesh of max of 5 mm. In case HCR cartridges are immersed in water without flow, special cautions to prevent marine growth is to be taken, to maintain correct functionality of flow limiting valve.

## Frese ALPHA HCR Cartridge

Technical Data

Frese ALPHA HCR Type 60

Suitable for wafer: DN50 to DN450 **HCR cartridge material:** PPS glass-reinforced

**O-rings:** EPDM 281

**Spring:** Hastelloy C276

(high corrosion resistant)

**Diaphragm:** HNBR reinforced

**Medium temperature:** -20°C to +50°C (Seawater)

**Diff. pressure range:** 47 - 600 kPa

(max 300 kPa recommended)

**Dimensions** 

Type 60 - PPS

Frese ALPHA HCR Type 20

Suitable for wafer: DN25 to DN40

**Cartridge material:** Super Duplex, EN 1.4410

**O-rings:** EPDM 281

**Spring:** Hastelloy C276

(high corrosion resistant)

**Diaphragm:** HNBR reinforced **Medium temperature:** -20°C to +110°C

**Diff. pressure range:** 21 - 600 kPa **For Valve Housing:** DN25 & DN40 Type 20 - Super Duplex

DN25-DN450

# Frese ALPHA Cool Cartridge

Technical Data

Frese ALPHA Cool Type 60

Suitable for wafer: DN50 to DN800 **HCR cartridge material:** PPS glass-reinforced

**O-rings:** EPDM

**Spring:** Stainless steel 1.4310

**Diaphragm:** HNBR reinforced **Medium temperature:** -20°C to +80°C **Diff. pressure range:** 11 - 600 kPa

Product Programme

# PPS - Type 60 for DN50-DN800

#### Specification Text

- The valve shall comply with flanges according to ANSI/ASME B16.5 standards
- The pressure class for the valve housing shall be PN16 or above
- The valve housing shall be made of Nickel Aluminium Bronze EN 1982 CC333G-GC
- · The valve shall contain pressure independent flow cartridges
- The valve shall operate up to a maximum differential pressure of 600 kPa
- The temperature medium (sea water applications) working range for the valve shall be -20°C to +32°C
- The valve shall be supplied with 1" PT plugs
- The PT plugs shall be made of Nickel Aluminium Bronze
- The fasteners shall be made of duplex steel
- The valve shall be fitted with the Frese ALPHA HCR pressure independent flow cartridge
- The Frese ALPHA HCR cartridge for sizes DN50-DN800 shall be made of PPS glass-reinforced
- The Frese ALPHA HCR cartridge for sizes DN25 and DN40 shall be made of Super Duplex
- The flow rate should be defined by interchangeable orifice plate within the cartridge
- The cartridge diaphragm should be made of reinforced HNBR
- The cartridge O-rings should be made of EPDM
- The Frese ALPHA HCR cartridge spring shall be made of Hastelloy C276 stainless steel
- The Frese ALPHA Cool cartridge spring shall be made of 1.4310 stainless steel
