

Frese DELTA T Control System

Text for technical specifications

The DELTA T Control System shall be able to control both heating and cooling applications.

The DELTA T Control Unit shall automatically detect if mounted in a heating or a cooling application and indicate this by means of LED lights.

The DELTA T Control Unit shall, by an LED display, show the set point ΔT and the actual ΔT .

Design ΔT shall be set with steps of 0.1°C.

The DELTA T Control System shall consist of 1 DELTA T Control Unit and 2 temperature sensors with 2 m cables.

Feedback signal 0-10V.

The temperature sensors shall be mounted on the pipes without intrusion of, or modification to, the pipes.
